

## I N D E X

PARK, SEHIE: An alternative principle for connected ordered spaces.....	3–12
DEFEVER, FILIP, DESZCZ, RYSZARD, HOTŁÓŚ, MARIAN, KUCHARSKI, MAREK, ŞENTÛRK, ZERRIN: Generalisations of Robertson–Walker spaces .....	13–24
NOIRI, TAKASHI, POPA, VALERIU: On upper and lower weakly $\beta$ -continuous mul- tifunctions .....	25–48
FINTA, BÉLA: Characterization of the isosceles and the equilateral triangle by algebraic relations .....	49–60
NOSZÁLY, CSABA, TÓMÁCS, TIBOR: A general approach to strong laws of large numbers for fields of random variables .....	61–78
TEMESVÁRI, ÁGOTA H., VÉGH, ATTILA: Über die Dicke von $\langle p, q \rangle$ -Punktsystemen in der Euklidischen Ebene .....	79–100
SIMON, P.: A note on the Sunouchi operator with respect to Vilenkin system.....	101–116
SHERWELL, DAVID: Note on normal numbers and uniform distribution of se- quences.....	117–123
STOYAN, GISBERT: On inhomogeneous velocity boundary conditions in the Förste model of a radiating, viscous, heat conducting .....	125–138
LÓCZI, LAJOS: The gradient-Fourier method for nonlinear elliptic partial differen- tial equations in Sobolev space.....	139–149
BÖRÖCZKY, KÁROLY, JR., WINTSCHE, GERGELY: Sphere packings in the regular crosspolytope .....	151–157
FRIED, KATALIN, JAKUCS, ERIKA, SZEREDI, ÉVA: A proof of Escher’s (only?) theorem .....	159–163
SERVATIUS, BRIGITTE: On the rigidity of Ramanujan graphs .....	165–170
