

# I N D E X

RAMADAN, M.: The influence of $S$ -quasinormality of some subgroups of prime power order on the structure of finite groups .....	3–9
VATTAMÁNY, SZ., VINCZE, CS.: Two-dimensional Landsberg manifolds with vanishing Douglas tensor .....	11–26
KISS, G.: Extremal Frobenius numbers in some special cases .....	27–31
SZILI, L.: On the “good” nodes of weighted Lagrange interpolation for exponential weights .....	33–38
DATTA, S., MATHUR, P.: Modified weighted $(0; 0, 2)$ -interpolation on infinite interval $(-\infty, +\infty)$ .....	39–52
DATTA, S., MATHUR, P.: On modified weighted $(0, 1, \dots, r-2, r)$ -interpolation on an arbitrary system of nodes .....	53–64
DATTA, S., MATHUR, P.: A note on weighted $(0, 1, 3)$ -interpolation on infinite interval $(-\infty, +\infty)$ .....	65–81
HUO, H-F., LI, W.: Interval oscillation criteria for second order forced nonlinear differential equations with damping .....	83–93
CIFRE, MARÍA A. HERNÁNDEZ: Area-inradius and diameter-inradius relations for covering plane sets .....	95–105
BU, QINGYING: A characterization of adjoint 1-summing operators .....	107–113
HEGEDŰS, CSABA J.: Short proofs for the pseudoinverse in linear algebra .....	115–121
KEMPRASIT, YUPAPORN: Infinitely many bi-ideals which are not quasi-ideals in some transformation semigroups .....	123–128
DIMOV, IVAN, FARAGÓ, ISTVÁN, HAVASI, ÁGNES, ZLATEV, ZAHARI: <i>L</i> -commutativity of the operators in splitting methods for air pollution models	129–150
HEGYVÁRI, NORBERT: Thin complete subsequence .....	151–156
KOZMA, LÁSZLÓ, PETER, RADU, VARGA, CSABA: Warped product of Finsler manifolds .....	157–170
TERLIZZI, LUIGIA DI, KONDERAK, JERZY, PASTORE, ANNA MARIA, WOLAK, ROBERT: $\mathcal{K}$ -structures and foliations .....	171–182
BAEK, JONG-IL, LIANG, H.-Y.: Convergence of moving average processes deduced by negatively associated random variables .....	183–198
