

INDEX

QUEK, T. S., YANG, D.: Bilinear operators over Vilenkin groups and their applications	5–33
SZILI, L.: Uniform convergent discrete processes on the roots of four kinds of Chebyshev polynomials	35–62
STRAUBER, GYÖRGYI: Discrete Crouzeix–Velte decompositions on non-equidistant rectangular grids	63–82
KUBAYI, D. G.: On the weighted Lebesgue functions for general exponential weights	83–105
KUBAYI, D. G.: A note on the “good” nodes of weighted Lagrange interpolation for non-even weights	107–113
NOIRI, TAKASHI, POPA, VALERIU: A unified theory of contra-continuity for functions	115–137
KISS, G.: On the extremal Frobenius problem in a new aspect	139–142
JÄGER, WILLI, SIMON, LÁSZLÓ: On transmission problems for nonlinear parabolic differential equations	143–158
TÚRI, JÓZSEF: Almost sure functional limit theorems in $L^p([0, 1]^d)$	159–169
HOŁUBOWSKI, WALDEMAR: A normal structure of McLain groups	171–177
ČOMIĆ, IRENA, KAWAGUCHI, HIROAKI: Some invariants in Miron’s $Osc^k M$	179–192
FARKAS, M.: The result of even allocation of funds for postgraduate training	193–198
