

I N D E X

HORVÁTH, J., TEMESVÁRI, Á., H.: Einige Extremumaufgaben für D–V Zellensysteme von diskreten Punktsystemen	3–18
DESZCZ, R., HOTLOŚ, M.: On hypersurfaces with type number two in space forms	19–34
OLAJOS, P.: Power integral bases in orders of composite fields II	35–41
GYENES, Z.: A small convex polytope with long edges, many vertices and quadrangle faces only	43–45
KÁROLYI, GY.: On restricted set addition in Abelian groups	47–54
DOROSHENKO, A., PRUSOV, V.: Modeling and forecasting atmospheric pollution over region	55–73
HRASKÓ, A.: Ponzag theorems	75–80
MÁRKUS, A.: The conjugate gradient method for 4th order nonlinear elliptic problems	81–94
MAHER, PH.: Spectral approximants involving balanced and convex sets	95–99
BERINDE, V.: A common fixed point theorem for quasi contractive type mappings	101–110
FARKAS, J. Z.: On the asymptotic behaviour of the non-autonomous Gurtin–MacCamy equation	111–120
CALDAS, M., GEORGIU, D. N., JAFARI, S., NOIRI, T.: A unified theory of $T_{\frac{1}{2}}$ -spaces	121–131
HORVÁTH, E.: On a fundamental theorem of reflection geometry	133–148
ISIDRO, J. M., STACHÓ, L. L.: On the Jordan structure of ternary rings of operators	149–156
GYARMATI, K.: An inequality between the measures of pseudorandomness	157–166
MÁTRAI, T.: The ω_1 -limit of Baire-2 functions is Baire-2	167–174
KOVÁCS, G., VIZVÁRI, B.: Elementary results in control of one-dimensional discrete time dynamical systems defined by a multifunction	175–189
