

I N D E X

NAGY, GY.: Tessellation-like rod-joint frameworks	3–14
RECSKI, A., SALAMON, G., SZESZLÉR, D.: Improving size-bounds for subcases of square-shaped switchbox routing	15–24
MOCANU, M.: Semi-separated sets in generalized closure spaces	25–42
BARON, S., LIFLYAND, E., STADTMÜLLER, U.: The Fourier integrals of functions of bounded variation	43–52
CSÁSZÁR, Á.: Intersections of open sets in generalized topological spaces	53–57
CSÁSZÁR, Á.: λ -open sets in generalized topological spaces	59–63
EKICI, E., JAFARI, S.: On \mathcal{E} -sets and \mathcal{F} -sets and decompositions of α -continuity, quasi-continuity and \mathcal{A} -continuity	65–73
CALDAS, M., EKICI, E., JAFARI, S., NOIRI, T.: On the class of contra λ -continuous functions	75–86
GYARMATI, K.: A note to the paper “On a fast version of a pseudorandom generator”	87–93
FRIED, E.: Corrections to my paper “Discriminator or dual discriminator?”	95–101
CALDAS, M., JAFARI, S., NOIRI, T.: A weaker form of pre- R_0	103–108
KOVÁCS, K.: On triples of consecutive Legendre symbols	109–114
BESENYEI, Á.: Stabilization of solutions to a nonlinear system modelling fluid flow in porous media	115–136
FLEISCHER, I.: “Continuity space” = quasi-uniform space	137–138
LEINDLER, L.: A theorem on integrability of trigonometric series	139–145
