

I N D E X

György Elekes (1949–2008)	3
GYÖRGY ELEKES : Density version of a theorem of Beck and Szemerédi– Trotter in combinatorial geometry	11–17
HAJNAL, A.: Gyuri Elekes and set theory	19–23
SIMONOVITS, M.: Personal reminiscences, Gyuri Elekes	25–30
LOVÁSZ, L.: The “little geometer” and the difficulty of computing the volume	31–36
KÁROLYI, GY.: Incidence geometry in combinatorial arithmetic in memo- riam György Elekes	37–43
RÓNYAI, L.: The work of György Elekes on some combinatorial properties of polynomials	45–51
SIMONOVITS, M., SZABÓ, E.: Gyuri Elekes and the incidences	53–73
SHARIR, M.: On distinct distances and incidences: Elekes’s transformation and the new algebraic developments	75–102
DESZCZ, R., PRVANOVIC, M.: Roter type equations for a class of anti-Kähler manifolds	103–121
JAFARI, S., NOIRI, T., POPA, V.: On θ -compactness in ideal topological spaces	123–130
PÁLVÖLGYI, D.: Partitionability to two trees is NP-complete	131–135
SAHA, S. K.: On quasi Ricci Riemannian manifolds	137–145
Conferences	147
